

# Micro Balancer

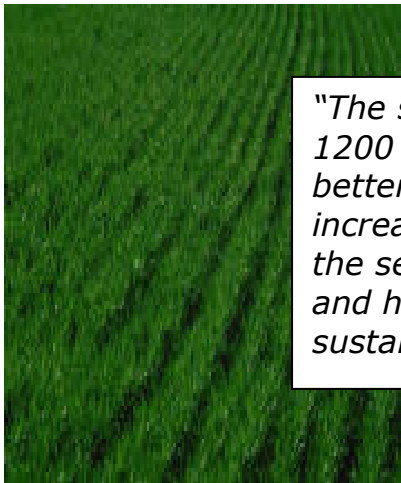

## Conventional Treatment

- 90 Units of Traditional Nitrogen  
Resulting in:
  - Tight Soil
  - Anaerobic Bacterial Activity
  - No Earthworms
  - Decreased Plant Growth
  - 3.5 Irrigations
  - Yield 3.5 Ton/Acre

## Micro Balancer Treatment

- 30 Units of Traditional Nitrogen  
Resulting in:
  - Flocculated Soil
  - Aerobic Bacterial Activity
  - Earthworms
  - Increased Plant Growth
  - 2 Irrigations
  - Yield 4.5 Ton/Acre

*"The sustainable program has had a positive influence on our 1200 Acre irrigated farm. We have never seen our soil in better condition. The bushel weights of our seed crops have increased, and we have not had a germ problem with any of the seed raised since initiation of this program. Fertilizer and herbicide usage has decreased 40% since we began the sustainable agricultural program 9 years ago."*

*Vibbert Ranch-Oregon*

SOIL  
RESTORATION<sup>N</sup> LLC  
[www.growthspurt.org](http://www.growthspurt.org)

*Soil Restoration LLC's mission is to develop and market products that restore and enhance the soil's nutritional balance. The beneficial application of our organic based products increases both the quantity and quality of crops. It is non-polluting and will ultimately improve the quality of human health in our world.*
